Dear **Ondřej Kolář!**

My name is Konstantin Belov, I am a chairman of the board of the Public Youth Movement “The youth league of the Pskov region”. Our organization is located in Pskov region, which locates in the north-west of Russia and has borders Estonia, Lithuania, and Belarus Republic. We have been engaged in preserving our historical memory of the Baltic countries territories more than five years. There is a large number of the Lithuanian and Latvian authorities, which we have built partnerships with respect to historical and memorial activities. In 2015, we have found understanding with the mayor of Vilnius Remigijus Šimašius on an issue related to the dismantling of the four sculptures of the Soviet era from the Green Bridge in the capital of the Lithuania. Our organization works closely with social activists from other Russian regions and European states in the preservation of historical memory.

The monument to the Soviet commander Ivan Konev in Prague is our memory, like yours in the regions of Russia, where there are monuments to Czech legionnaires, who died in the 1920s. Many Russians, representatives of public organizations, have a mixed attitude to the activities of the “Czechoslovak Corps” in our country, which can also be supported at the municipal level.

Cooperating with public organizations of European countries, we proceed from the fact that everyone has their own historical memory, which is the basis of the intergenerational continuity as well as national and civic identity. We strive to form a civilized framework of cooperation with European youth representatives on issues of historical and memorial activity.

Therefore, we suggest you a civilized solution on the issue related to the monument to Ivan Konev between the municipality and the Russian public organization. We kindly ask you to convey it to us. We are ready to reimburse all financial costs associated with its transfer, transportation and other services.

We anticipate your cooperation.
